MOUNTING INSTRUCTIONS

Westport Mirror, Small

137279

These instructions are provided for your convenience. It is very important that they are read carefully and completely before beginning installation of this item.

Tools Needed: Drill, Phillips head screw bit, Measuring tape, Hammer, Bubble Level, Pencil

Parts List:

- A) Mirror x 1 pc
- B) Knob x 1 pc
- C) 9" Female Metal Cleat x 1 pc
- D) Wall Screws x 5 pcs
- E) Wall Anchors x 5 pcs

(B) 

(C) 

(D) 

(E) 

To Assemble:

1. Remove all parts and hardware from the box along with any plastic protective packaging. Do not discard contents until after assembly is complete to avoid accidentally discarding small parts or hardware.
2. Place components on a non-scratching surface.
3. Determine the desired location of the mirror. Mirror is equipped with 1 Female Metal Cleat (C) for hanging. The Knob (B) is decorative and not intended to support the weight of the mirror.
4. Using the Female Metal Cleat, position cleat and decorative Knob on wall in desired location and mark the hole locations on the wall with pencil.
NOTE: It is strongly recommended to install cleat with screws attaching directly into wall studs.
5. Use bubble level to ensure level positioning.
6. Using the drill, pre-drill holes at both marked locations.
NOTE: If mirror location will be installed in sheet rock or masonry, use appropriate drill bit size to accommodate wall anchors at locations between wall studs. Using a hammer, gently tap anchors into the holes until they are flush with the wall. Anchors provided are for sheetrock. For masonry anchors, consult your local hardware store.
7. Place Female Metal Cleat over hole locations and insert screws accordingly. Fix the knob over the corresponding hole location and insert.
8. Tighten screws firmly. Do not overtighten.
9. Lift the mirror, align the Male and Female Metal Cleats, then slide downwards firmly until cleats engage.
10. Installation is complete.

Care Instructions: Dust with a soft, dry cloth. Do not use abrasive cleaners
